

Module 3 – Urgency UI Policy Action

Configure the Urgency field behavior for High Impact Incidents

Purpose

Configure a UI Policy Action under High Impact Control so that Urgency becomes read-only when Impact is High.

Navigation

Open the High Impact Control UI Policy and scroll to the UI Policy Actions related list.

Configuration

Field name: Urgency

Read-only: true

Visible: leave unchanged

Steps

1. Open High Impact Control.
2. Scroll to UI Policy Actions.
3. Click New.
4. Select Urgency as the field.
5. Check Read-only.
6. Leave Visible unchanged.
7. Click Submit.

Verification

Open an Incident record and set Impact to High. Urgency should become read-only. Change Impact to another value and confirm that the read-only behavior is reversed when the UI Policy condition is false.

Expected Result

Users can see the Urgency value but cannot manually modify it while the High Impact UI Policy is active.
