

Module 7 – Testing & Verification

Validate all UI Policies and Client Scripts

Activity 1 – Mandatory Enforcement

1. Go to Incident → Create New.
2. Set Impact to High.
3. Leave Assigned To empty.
4. Click Submit.
5. Confirm the record is not saved and the Assigned To error appears.
6. Confirm High Impact UI Policy behavior is active.

Activity 2 – Successful Save

1. Select a user in Assigned To.
2. Click Submit.
3. Confirm the Incident saves successfully.
4. Confirm Urgency was auto-set to High.
5. Confirm Urgency is read-only while Impact is High.

Activity 3 – Reverse Condition

1. Open an existing High Impact Incident.
2. Change Impact from High to Medium.
3. Confirm Assigned To is no longer mandatory due to the reversed UI Policy condition.
4. Confirm Urgency becomes editable.
5. Save the record.

Activity 4 – List Edit Blocking

1. Go to Incident → All.
2. Double-click State.
3. Attempt a State change.
4. Confirm the alert appears and `callback(false)` prevents the change.

Activity 5 – Form-Based Update

1. Open the same Incident form.
2. Change State.
3. Click Update.

4. Confirm the State change is saved through the form.

Test Matrix

High Impact + Assigned To empty → Save blocked.

High Impact + Assigned To populated → Save allowed.

High Impact → Urgency automatically set to High.

High Impact → Urgency read-only.

Impact changed away from High → UI Policy behavior reverses.

List State edit → Blocked.

Form State update → Allowed.
